

Junqing Chen

M.Sc. Student | Full-Stack & Backend Developer

Viana do Castelo, Portugal | (+351) 966 396 682 | chenjunqing2001@gmail.com

Summary

M.Sc. student in Informatics Engineering at the University of Minho, expected to graduate in 2027, with hands-on experience building full-stack web and IoT systems using FastAPI, Node.js, Vue.js, React, MQTT, and Docker. Seeking a remote internship in full-stack, backend, or frontend development with a company based in Portugal or elsewhere in Europe.

Education

University of Minho <i>M.Sc. in Informatics Engineering</i>	2025 – Expected 2027 Portugal
---	----------------------------------

Polytechnic Institute of Porto <i>B.Sc. in Web Information Systems and Technologies</i>	2021 – 2024 Portugal
---	-------------------------

Selected Projects

UrbMobSense: IoT Platform for Urban Micromobility Monitoring <i>Full-Stack Developer / Master's Project, University of Minho</i>	2025 – Present
--	----------------

Tech Stack: Dashboard web app, FastAPI, MQTT, InfluxDB, Python, Docker

- Designed and implemented a modular IoT platform that separates data ingestion, backend services, time-series storage, and visualization concerns to improve maintainability.
- Built a FastAPI backend with MQTT messaging and InfluxDB storage for ingesting and managing IoT telemetry data.
- Used Python for device simulation and data processing, containerized the system with Docker, and developed a web dashboard for mobility metrics and alerts.
- Documented the system architecture and methodology for a manuscript currently being prepared for peer-reviewed submission.

Meal Booking Platform <i>Full-Stack Developer / Final-Year Capstone Project, Polytechnic Institute of Porto</i>	2024
---	------

Tech Stack: Vue.js, Node.js, MySQL

- Owned the end-to-end development of a web-based meal reservation platform for administrators and customers, covering database design, backend implementation, frontend development, testing, and deployment.
- Built a Vue.js administrative dashboard for menu management, reservation status control, and customer feedback.
- Developed Node.js RESTful APIs and a MySQL data layer supporting responsive customer and administrator workflows.

Goodbuck Financial Application <i>Full-Stack Developer / Academic Team Project, Polytechnic Institute of Porto</i>	2024
--	------

Tech Stack: React, Node.js, MySQL, Git

- Collaborated in an Agile team to design and develop a personal finance application based on user requirements.
- Implemented Node.js backend services, RESTful APIs, and MySQL persistence for core financial planning workflows.
- Built responsive React features and used Git for version control, collaboration, and iterative delivery.

Technical Skills

Programming: JavaScript, Python, SQL, HTML/CSS

Frontend: React, Vue.js, Responsive Web Design

Backend & APIs: Node.js, FastAPI, RESTful API Design

Databases: MySQL, MongoDB, InfluxDB

Messaging: MQTT

Tools & Practices: Git, Docker, Figma, Agile/Scrum

Languages

Chinese (Native) | English (Fluent) | Portuguese (B1)
